

R.H. Tamlyn & Sons Celebrates 40th Anniversary as Building Products Manufacturer

04/18/2011

BuildingOnline eUpdate subscriber Tom Tamlyn, President of R.H. Tamlyn & Sons, LP, writes in to announce the company is celebrating their 40th anniversary in 2011--a proud achievement from its humble beginnings in a Texas backyard in 1971. The company has grown from manufacturing one product (aluminum plyclips) to hundreds of products today, including Xtreme Trim™, a [James Hardie](#)-recommended trim for fiber cement. Tamlyn also manufactures joist and truss hangers, brick ties, hurricane clips, straps, and holdowns, as well as special and custom welded hangers.

"We want to thank the industry for its continuing support from builders and architects to dealers and distributors. We know without support products amount to nothing but dust on a shelf," Tamlyn writes. The company prides itself on manufacturing its products in the USA.

eUpdate congratulates Tamlyn on four decades in business.
